

**Appln No. 10/528,502**  
**Amdt date April 19, 2007**  
**Reply to Office action of January 19, 2007**

**Amendments to the Specification:**

Please amend the specification as follows:

On page 5, second paragraph, please amend the following:

The lower part of spotlight housing 1 is substantially square and has two parallel side walls 11, 12, a front and back side wall 13, 14 as well as an underneath side 15. The lower part of spotlight housing 1 is connected to the upper spotlight housing part (not shown) through several connecting elements on the front and back side walls 13, 14 and the side walls 11, 12.

On page 6, fifth paragraph, please amend the following:

As can be seen from the sectional views through the spotlight housing [[1]] according to Figures 2 and 3 several ribs [[7]]9 are provided parallel to each other inside the ventilation shafts 61 to 65 where they are arranged at regular intervals to each other and to the side walls of the ventilation shafts 61 to 65. The ribs 9 define ventilation ducts 7 within the ventilation shafts. The light-absorbing ribs [[7]]9 are bent so that they have a first section 91 (Figure 3) adjoining the air inlet aperture 71 to 73 as well as a second section 92 adjoining the air outlet aperture.

On pages 6-7, beginning at the last paragraph on page 6, please amend the following:

As can be seen from the cross-sectional view according to Figures 2 and 3, the ribs 9 can project beyond the air outlet apertures 81 and [[form]]from there a bent air guide section 94, 96 or an air guide section 93, 95 which is aligned with the second section.
